

WebSocketImpl

```
classDiagram
    class WebSocketImpl
    class WebSocketDesktop
    class WebSocketWeb
    WebSocketDesktop --|> WebSocketImpl
    WebSocketWeb --|> WebSocketImpl
```

The diagram illustrates a class hierarchy. At the top is the 'WebSocketImpl' class. Below it are two subclasses: 'WebSocketDesktop' on the left and 'WebSocketWeb' on the right. A horizontal line connects the two subclasses, with a vertical arrow pointing upwards from the center of this line to the 'WebSocketImpl' class, indicating that both subclasses inherit from the base class.

WebSocketDesktop
